Professional Summary

Results-driven **Incident Manager** with **6+ years** of experience owning end-to-end incident lifecycle management for enterprise SaaS platforms (Oracle B2C Cloud). Consistently resolved **50+ monthly P1/P2 incidents** at **95%+ SLA adherence**, reduced **MTTR by ~25%** through triage optimization, and cut recurring incidents by **20–30%** via structured RCA methodology. Proven **night-shift SPOC** (4+ years) and P1 bridge call leader with deep expertise in **ITSM, REST APIs, SQL, and backend log analysis**. ITIL v4 Foundation in progress; ServiceNow (learning stage).

Skills

Incident & Operations: Incident Management, P1/P2 Triage, Major Incident Management, Problem Management, RCA, SLA Management, MTTR/MTTD, Production Support

ITSM Tools: Cherwell, ServiceNow (Basic), JIRA

Technical: SQL, REST API Testing, JSON, Backend Log Analysis, Oracle B2C Cloud

Methodology: ITIL v4 (In Progress), Agile/Scrum

Productivity: Microsoft Excel, PowerPoint

Work Experience

Infogain

Noida, India

Incident Manager / L2 Application Support Engineer (Consultant Developer)

Jan 2020 – Present

- **Owned end-to-end incident lifecycle** (triage → investigation → resolution → RCA) for Oracle B2C Cloud, a mission-critical enterprise SaaS platform serving global clients.
- **Resolved 50+ P1/P2 incidents per month** with **95%+ SLA adherence**, maintaining high system availability and meeting business-critical uptime commitments consistently.
- **Reduced MTTR by ~25%** by redesigning triage workflows, escalation paths, and cross-team coordination protocols, directly improving mean time to resolution across all incident tiers.
- **Served as sole SPOC for night shifts (4+ years)**, independently managing all critical production incidents end-to-end with zero escalation failures and full stakeholder ownership.
- **Led P1 major incident bridge calls**, coordinating development, QA, infrastructure, and business stakeholders for rapid, structured resolution under high-pressure conditions.
- **Recovered from full-site outage within ~2 hours**, executing a rapid incident response plan that minimized revenue loss and operational impact for the client.
- **Drove RCA-based problem management** initiatives that reduced recurring incident volume by **20–30%**, improving platform stability and reducing noise in the incident queue.
- Performed **REST API diagnostics, SQL-based data validation, and backend log analysis** to accelerate root cause identification and reduce dependency on development team triage.
- Supported **Agile/Scrum** release cycles including deployment validation, post-release monitoring, and regression incident tracking across bi-weekly sprints.

Achievements

- **Spot Award (Feb 2022) – Infogain:** Recognized for outstanding incident management performance – 95%+ SLA across 50+ monthly P1/P2 incidents, ~25% MTTR reduction, and 20–30% drop in recurring issues through structured RCA.

Certifications

- **ITIL v4 Foundation** – In Progress (Coursera)
- **AWS Cloud Practitioner** – In Progress (Self-learning with Coursera)
- **Generative AI Practitioner, Fundamentals & Beginner** – Infogain Excellence Program
- **Prompt Engineering for ChatGPT** – Coursera / Infogain Certified

Education

ITER, Siksha ‘O’ Anusandhan University

Bachelor of Technology – Information Technology

Bhubaneswar, India
